New Left Review (Althusser and Health Arguments)
By Perry Anderson

Part I – The Originals

I. Healthcare and Psychoanalysis – the Concept of Human and Life Sciences

In fact the mind and body are to be treated in a unified dialectical life which then is shaped by its habitus and quilted by its individual, group, social and institutional dynamics which then is its symbolic circle, net and formalism which then is the movement of God which is finally a spiritual movement in the sense of a social movement which embeds an individual in the social habitus and concrete circumstance which he is trying to change and uplift the people and himself into the infinite Platonism of the Republic with health, and psychoanalysis part of its social order with assigned places for even militants, philosophers, intellectuals, and journalists and even forms of medical staff, and types of organisers and large parties which then forms the law as well that in fact the leader is attacked by the militants in line with the poorest feminist mass which then argues for the perfect cure of the Platonist republic – which means “no place for bourgeois media” is also “no healthcare of bourgeois reaction” and finally “voluntarism to support the feminist women in difficult health” and finally “trust in the leader and people that he will recover with the people and women in solidaity” which means that in fact the leader is mass and individual both – not just an individual. Plato’s idea of a leader is one who is vertical but also horizontal in the sense of a dialectic between mass and individual.

II. Healthcare in the Mass Revolt – News on Why Sirohi Suffered this Year – the Zizek Language of the Concept of Zizekianism

The transcendental standpoint on the possibilities of the current revolution in India intertangled with Algeria and Cuba, even China and Israel and Palestine, even Latin America is finally the process of a deadlock in contemporary healthcare and psychoanalysis which is the problem of feminist education, health and even poor women’s rights towards what one can call the Arcana of Reproduction which means the Symbolic order then excludes women from symbolic health and education which includes sexuality and sex talking and even forms of healing psychoanalysis without which they would be deprived of a form and style of identical equality that is Communism – the process creates lapsing and violence on the leader who is finally part of a hoplite leadership which then is the problem of even Fidel and Che and even Mao undergoing depression or stress dynamics because of the same reflection which then wins and achieves what Cuba is calling pure healthcare in science by Sirohi.
